

Hello Sir,

My name is Hmimic At-Lmulud and I am a Virginia resident born in Kabylie (A region under Algerian Government control). I am forwarding to you the message sent by Ferhat Mehenni (The President of the Provisional Government of Kabylia) to several International Organizations regarding the dire situation of Kabyle people.

With the message there is a letter from a friend of MAK who gave a general idea about Kabyle people and their struggles to recover their sovereignty.

Beside the repression against the pacific activists for Kabylie (Arrests, harassment, abuse and so forth) the Algerian regime is destroying the environment and homes of that region by setting deliberate wild fires.

The Kabyles who stand up indefinitely against the tyranny of Algerian power are being violated in the most inhuman ways by the dictatorial regime of Algiers and its repressive services. The latter wants to impose on Kabylia an unconditional surrender treaty involving Arabization and Islamization. With its two operational arms (Arab and Islam) for a long time, here it is again with the politics of the scorched earth to show the Kabyles its determination to put an end to their resistance. The destruction of crops and other living resources, infrastructure and environment represents for the Algerian regime the inaugural act of submission or eradication of Kabylia. It is a war of extermination, a horrible tactic, unprecedented in the history of civilization. Burn your own cities! The devil inspires these people. What a fierce resolution, what audacity.

We are counting on your comprehension and understanding to look at this catastrophic situation and do what is possible to stop this genocide the Algerian regime is perpetrating with impunity.

Best Regards;

Hmimic At-Lmulud Arlington; VA
